

*Effectively used
to reduce:**

- Lead
- Arsenic (pentavalent)
- Nitrates
- Cyst (cryptosporidium)
- Fluoride
- Radium 226/228

ECLIPSE™

MODEL WRO-35

Eclipse™ Model WRO-35 is Tested and Certified by NSF International against NSF/ANSI Standard 58 for the reduction of the claims specified on the Performance Data Sheet.

The Eclipse™ Reverse Osmosis Drinking Water System is designed to provide your family with the cleanest, healthiest water possible. Multiple filters clean ordinary household water to reduce unwanted and harmful contaminants.* System performance is verified with a touch monitor on the system's faucet base. Installation is also simple — no electricity needed.

- Healthy, sparkling-clear drinking water
- Pristine, flavorful coffee, tea and juice
- Clearer ice cubes
- Better tasting soups, sauces and meals when prepared with R.O. water
- Environmentally sound water treatment
- Cost effective: the daily cost of bottled water will no longer be a concern
- Convenient: fresh, clean water ready at your tap — no more handling of jugs

** See the Eclipse™ Performance Data Sheet for specific percentages of contaminant reduction.*

Superior Features:

- High flowing Thin Film Composite (TFC) membrane
- Dual sediment/carbon block pre-filter — longer life with superior filtration
- Disposable filters are clean and sanitary — no messy cartridges to handle
- Tested and certified by NSF International against NSF/ANSI Standard 58 for the reduction of the claims specified on the Performance Data Sheet
- Tested and certified for cyst reduction, including cryptosporidium
- Tested and certified for health related claims (see Performance Data Sheet)
- TDS Faucet Monitor checks the operation of the system
- Nitrate/Nitrite Test Kit to ensure your protection

Monitor Water Quality Right at the Tap

The water quality monitor is a standard feature of the ECLIPSE™ water dispenser. Just a push of the button gives you and your family the assurance of the highest quality water.

HOW DOES THE SYSTEM WORK?

The water from your ECLIPSE™ R.O. System is filtered four times before it ever reaches your glass, giving your family healthy, deliciously crystal clear drinking water. The ECLIPSE™ 4-stage system utilizes:

- 1) A dual sediment pre-filter system which first reduces dirt, sediment and other particles that can cause cloudy, unappealing water, while the second stage reduces chlorine and other elements that cause bad tasting water.
- 2) The ECLIPSE™ membrane separates your household water at the molecular level. It acts as an ultra-fine filter to trap and isolate contaminants,* substantially reducing dissolved solids invisible to the naked eye.
- 3) Any tastes or odors remaining in the water will be reduced by the carbon post-filter before the water enters the reservoir tank.
- 4) The final polishing filter is a second activated carbon filter attached just before the water enters the faucet. It's your added assurance of good tasting, crystal clear water.

The larger membrane capacity of the Eclipse™ produces more clean water on a daily basis compared to other systems of similar size.

The ECLIPSE™ Model WRO-35 R.O. Drinking Water System is tested and certified by NSF International to NSF/ANSI Standard 58 for the reduction of :*

- lead
- arsenic (pentavalent)
- copper
- nitrates
- nitrites
- cyst (cryptosporidium)
- barium
- selenium
- cadmium
- fluoride
- TDS
- radium 226/228
- chromium (hexavalent)
- chromium (trivalent)

*See the Eclipse™ Performance Data Sheet for specific percentages of contaminant reduction.

All reverse osmosis systems are designed for use with water that is reasonably free of contaminants that can clog or damage the microscopic filters of the R.O. system. Your authorized Water-Right dealer can test your water quality to determine the best R.O. system for your household as well as any other appropriate water treatment solutions needed.

R.O. System Pre-Requirements

- Less than 10 GPG Hardness
- Less than 0.1 PPM Iron
- Less than 0.05 PPM Manganese
- No Hydrogen Sulfide
- Use only on microbiologically safe water
